IEEE PDF Compliant

In order for your paper to be acceptable for IEEE Xplore, you must use the ICIEA 2012 Template.

After you have used our ICIEA 2012 Template to create your source file in Letter size, you must also **configure the Program that converts your file** to **produce a Letter size** PDF file.

For those using the LaTeX template, please ensure that the following codes are not deleted or shifted:

```
% setup page to suit conference specification
\documentclass[conference,letterpaper]{IEEEtran}
\setlength{\paperwidth}{215.9mm}
\setlength{\hoffset}{-9.7mm}
\setlength{\oddsidemargin}{0mm}
\setlength{\textwidth}{184.3mm}
\setlength{\columnsep}{6.3mm}
\setlength{\marginparsep}{0mm}
\setlength{\marginparwidth}{0mm}

\setlength{\paperheight}{279.4mm}
\setlength{\voffset}{-7.4mm}
\setlength{\topmargin}{0mm}
\setlength{\headheight}{0mm}
\setlength{\headsep}{0mm}
\setlength{\topskip}{0mm}
\setlength{\textheight}{235.2mm}
\setlength{\footskip}{12.4mm}

\setlength{\parindent}{1pc}
```

Kindly note that IEEE PDF eXpress only check your file for IEEE PDF Compliant. It does NOT check whether your file is compliant to ICIEA 2012 template. Hence, you have to format your file according to our ICIEA 2012 Template even though your file may be 'Certified by IEEE PDF eXpress'.
